☐ Unknown

Aircraft Explosion

- ☒ None
☐ In-Flight
☐ On-Ground
☐ Both Ground and In-Flight
☐ Fire at Unknown Time
☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Left gear, left wing + tip, prop strike + ended up
standing on nose/prop + L. wing tip

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Ferry flight N1739K departed KIDA at approximately 8:40 AM, on 01/27/2025. Weather was cold (-2°F) and clear. Winds were forecast to be minimal through Wyoming, to Cheyenne, where a tailwind was forecast for the last part of the SE leg to Colby, KS. (KCBK)

First refuel stop was KEMM, then KLAR. Oil was added because of increased consumption at Laramie. For the last leg of the flight, pilot picked Brush Municipality Airport (7V5) to stop, stretch, and check the oil.

Approach was normal, touchdown was 3-point, and all was fine until left gear collapsed at approximately 50% of rollout, or about 30-35 mph. Left wing dipped, drag and aircraft came to an abrupt stop, standing on the nose. Final stopped position was on runway, left of centerline, with the tail in the air.

I remember shutting off fuel, and exit was easy, as the door came open by itself.

Emergency response was unbelievably fast and efficient!

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

There are some things you cannot anticipate or prevent.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Left gear failed, causing left wing to drag,
deacceleration caused nose to contact runway
and aircraft to end up on nose
This happened at approx 50% of Roll-out, or
about 35 mph, as aircraft did not end up
upside down

Total Time/ Cycles On Part

_____ Hours

_____ Cycles

Time Since This Part Inspected/Overhauled

_____ Hours

FUEL & SERVICES INFORMATION

Fuel on Board at Last Takeoff

(Convert from pounds, as necessary)

25 gal _____ Gallons

Fuel Type

ADDITIONAL INFORMATION (Additional space for answers to any question.)

I AM embarrassed to say the last. I was certain the Basic med was current thru Feb'25. My info that I have is that I did complete the Physician check-up 03/14/2024, but failed to do the computer part at that time.

I have in my records 2 older basic med application/completion sheets from 2019 and 2021.

I am healthy, active, and not on any medication.

I will complete the Basic med as soon as this report is filed, and plan to do it on an annual basis, on my birthday. Please advise me if that is OK.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE.
I understand that the information provided may be subject to public release.
