Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Aircraft fuselage, right wing totally destroyed by fire. Remaining areas of the aircraft degraded/damaged as well. All cockpit items destroyed by fire.

Note: The removal crew, removed remaining fuel from the left wing tank.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Engine HOBB start time recorded at the hanger at 1018.8 hours
1:18pm local time per picture time/date

A Local flight was intended under VFR weather. Normal taxi to Runway 18, holding in place for engine runup checks. Following the checklist, I checked the magnetos, I discovered one was not working correctly, the other was normal. I decided to return to the hanger, after a radio call advising the local airport traffic of my intention, I entered runway 18 and started to taxi down the runway.

About halfway down the runway, I smelled burned wire insulation, no smoke was noticed inside the cockpit.

As I slowed to make the right turn onto A1 taxiway, the engine died. The first attempt to restart, I heard a click of the starter etc.. Two other attempts with the starter switch resulted in no engine start action heard.

After entering A1, on the last engine start attempt, I looked over my right shoulder and saw flames over the wing refuel cap. I immediately exited the cockpit, ran to the FBO office and requested FBO employee to call the Fire Dept, that my aircraft was on fire on A1 taxiway.

On the evening of the 2nd of February, a crew arrived to remove the aircraft from A1 and relocate it.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Name: _____

City: _____

City: _____

State: _____ ZIP: _____

State: _____ ZIP: _____

Country: _____

Country: _____

ADDITIONAL INFORMATION (Additional space for answers to any question.)

The normal gross weight is 1325lbs. Allowance for an extra 100 lbs per plans, if certain conditions apply. I operated from asphalt runways which allowed a total of 1425 lbs gross weight.

I have estimated the requested weight of the aircraft at the time of the accident.

Please note, all information has been provided as accurately as understood. Many forms required to be onboard were lost in the fire, such as the Original Airworthiness and Federal, State Registrations along with the BasicMed forms.

There was an onboard fire extinguisher (hand held bottle type of approximately 12" in length) however, the location of the flames over the right fuel tank / fill cap prompted me to evacuate the area fearing immediate explosion.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE.

I understand that the information provided may be subject to public release.
