Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Unknown as far as the extent of the damage due to it being completely dark when I crashed.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

⁶⁴
~~Around 10:~~ Between 10:00pm and 10:30pm, I was on my descent from 5500ft down to 2000ft from Class B. After reaching and maintaining 2000ft, I was about 10nm or so away from my target destination, which Ellington Airport (KEFD). When I started experiencing problems, engine or fuel problems. I quickly ran through emergency procedures, ⁶⁴ ensuring that whatever was causing the plane to lose power was able to be fixed. The plane still was having engine loss problems. From there I immediately contacted ATC to let them know that I was having problems and needed to head straight to Ellington. I was approved to head to Ellington but immediately knew I was not going to make it and from their let ATC know that I was unable to make it due to being too low in altitude. I then let ATC know that I would be diverting to Pearland because at that point I had no engine power or could not risk continuing to Ellington. Pearland was below me and started circling. I failed to add flaps to slow me down, so I came in to land extremely fast. I touched down mid-field and did not want to risk hitting the end of the runway so I decided to try and add power and it took off only to die again after reaching ⁶⁴ about 300 to 400 ft. I settled down ⁶⁴ in some trees where the trees ripped me forward and upside down where I stayed and the plane stayed until the next day.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

This accident could be avoided I believe in a couple ways.
 1.) Adding flaps to slow me down as soon as I had the runway in sight and could have used both the brakes and aerodynamic braking to stop the plane as soon as possible
 2) Probably should have just landed immediately and as soon as I landed contacted my instructor to contact the mechanic to try and address the situation.

ADDITIONAL INFORMATION (Additional space for answers to any question.)

I used foreflight for my flight plan but after the crash, all of my items were left in the plane and I was unable to retrieve them until Feb. 24th. After which my iPad was dead and was unable to pull ^{it} anything from my flight plan up.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE.
