Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Main landing gear collapse. Tailwheel Collapse. Tail boom cracked. Rudder damage. Winglet delamination. Propeller damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed from Fremont County K1V6 around 1300 local time. At the time the fuel gauges indicated 1/4 tank or approximately 8 gallons. Fuel burn is approximately 5 gallons per hour at max continuous. Climbed for about 15 minutes through about 1500-2000 feet agl and shut down the engine. Flew as a glider, to a few miles east of Kelley Airpark CO15 and started the engine to motor to Centennial KAPA airport under the shelf of the Denver KDEN Class B. Flew about 15 minutes towards KAPA, and was getting ready to contact the tower when the engine quit. I attempted to restart the engine for a few minutes without success. Decided to stow the engine to reduce the drag from the windmilling prop and cowl flaps. I attempted to find some lift to establish a climb but was unsuccessful as I looked for prospective landing places. I decided the west side of a large oval shaped road headed north was the best option. As I turned towards the base leg I extended the landing gear which created enough drag along with some sink that made that portion of the road unreachable. Decided to land to the east and uphill instead. As I got low and started to line up the landing I went through a fence that killed my remaining energy and landed hard diagonally across the road.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

I should not have trusted the fuel gauges alone. I should have also used a dipstick to check the fuel level in the wings.
