Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

The helicopter was destroyed when the main and tail rotor blades struck the concrete ramp and came apart. This impact caused sudden stoppage of the main and tail rotor systems. The main and tail rotor drive shafts failed after impact allowing the engine to run with no load while the aircraft was resting on its side. The tailboom separated from the fuselage and folded up under the left side. The landing skids broke from the impact. The fuselage, cabin doors, windows, and windshields were all damaged beyond any repair.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The pilot departed KPWA on a routine local news gathering flight at approximately 15:43 CT to Norman, Purcell, and Lexington, Oklahoma. The pilot returned to KPWA at approximately 17:52 CT and made a normal approach on landing. The pilot landed off center on the landing platform. He attempted to back out and straighten the helicopter. The right skid of the helicopter got caught on the landing platform. The helicopter went into a dynamic roll over.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Pilot error.
