NOTAMs (D and FDC), AIRMETS, SIGMETs, PIREPs in effect at the time of the accident/incident:

DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☐ Substantial
☒ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Concaved leading edge of last 2.5 feet of left wing. Wing tip is fractured with some parts separated, whelan wingtip strobe/position LED light and attachment broken. End rib and next rib in are bent.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Departed KDTN VFR with flight following, had no issues with entire flight until we landed and taxied to the ramp to park and tie down the airplane. I listened to the minute weather just before entering a left downwind for runway 20. Winds were 230 at 8 knots with no reported gusts, skies were clear, and I do not recall the barometric setting nor density altitude. Made a normal left traffic pattern and landed safely on runway 20. Taxied off at the intersection of Runway 31 and then turned left onto the taxiway before an almost immediate right turn onto the parking ramp. While taxiing in I was trying to identify where the parking Ts were and what orientation they were in. There were three aircraft already parked on the ramp, the only spots were on the south side of the ramp nearly adjacent to the fuel pumps and the hangar. Once I found the requisite spot to park, I veered over to where I could park on the T to shutdown. While slightly veering to the left, there was a jolt that occurred and the airplane started an uncommanded turn to the left. I immediately was on the brakes and brought the aircraft to a stop. I shut down the aircraft, exited, and surveyed what happened, then removed the tow bar and pushed the aircraft over to the intended parking spot and tied it down and chocked the wheels.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

This could have been avoided if I didn't feel it was required to taxi into position on the T. I could have just pulled forward where there as plenty of space, what down the aircraft and pushed it back onto the parking T. I do, however, feel that the light pole could somehow be better identified on the airport diagram, similar to a HS, since it is not customary for fuel pumps to be situated in the middle of the paved space so close to parking.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
