Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

RIGHT GEAR AND NOSE DAMAGED. NO PROPERTY DAMAGE

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Sunday May 18, 2025, 1:30pm CST, I, Waylon Scudder, and my wife, Sabra Scudder, departed on a VFR local flight from Mountain View, Mo, airport MNF from runway 10 in an Excalibur light sport aircraft, reg. N4831A SN:102898. Our intentions were to return 1.0hr later for landing. We flew over our farm in Eminence, Mo 21nm from KMNF. While at approximately 1500 feet AGL over our property we encountered a bird strike by a bird which seemed to be a very large vulture but we are not totally sure. The bird descended from above to the right of the fuselage striking the right hand landing gear separating it from its attached position. The strut brace held the remainder of the landing gear to the aircraft. We then made a direct flight back to Mountain View Airport MNF where we made a soft field landing along side the taxiway in a grassy area which used to be the grass runway for the airport. No further damage was done to the aircraft, the two occupants on board or the property where the landing took place except for the nose gear being bent. Mountain View City Police officer [REDACTED] and two State Hwy Patrol officers assisted us with the incident due to an incoming call from a local that seen the aircraft fly over with the damaged gear.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*
