Description of Damage to Aircraft and Other Property <i>(Use additional sheet, if necessary.)</i> Nose wheel structure bent and broken. Air frame at nose wheel attachment area is bent back into cabin. Propeller and spinner are damaged. Both wings have light damage. Fuselage damaged and bent between cabin and tail area. Main landing gear is bent. No property damages			
NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)			
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and			

intended destination. Provide as much detail as possible.

I checked the weather and AWOS at 10 am. We taxied out to hold short for 10 and performed preflight and run up. We departed runway 10 and proceeded 20 miles north of the airport at about 2500 feet. After about 40 minutes, we returned south to the airport and set up for a left down wind to runway 10 with intentions of landing on the designated runway 10 grass. The down wind, base leg and final approach were normal until I saw we were too high and I reduced power to lose some altitude. At some point I realized we lost more altitude than needed so I added power but the airplane got too slow as we were approaching the runway threshold. At that point the airplane stalled above the threshold and nose dropped with nose wheel impacting the turf and flipped over to an inverted position. We departed KPCZ at 1030am on runway 10. The purpose of this flight was for sightseeing and pleasure.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

The weather and sky conditions were good for the flight we conducted. I failed to fully consider the extra passenger weight and the effect it had on getting slow when on final approach. We have to remember as pilots that when we get slow it's time to really consider all factors to conduct a safe flight.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)

Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Total Time/ Cycles On Part

Hours _____

Cycles _____

	Time Since This Part Inspected/Overhauled Hours _____	
FUEL & SERVICES INFORMATION
