Description of Damage to Aircraft and Other Property <i>(Use additional sheet, if necessary.)</i> Broken Left gear, bent left wing tip, bent propeller blade				
NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)				
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.				

Planned landing at KSWW to refuel. After landing at KSWW, on ground roll about 1800' beyond touch down, a cross wind gust picked up the tail wheel off the ground causing to lose directional control, when the tail wheel touched the ground again after additional elevator control input, the plane swerved to the right and exited the runway, the terrain caught the left wheel and side loaded, causing the gear to collapse. The gear collapse caused the wingtip to and one side of the prop blade to bend.
