DAMAGE TO AIRCRAFT AND OTHER PROPERTY

Aircraft Damage		Aircraft Fire		Aircraft Explosion	
☐ None	☒ Substantial	☒ None	☐ Both Ground and In-Flight	☒ None	☐ Both Ground and In-Flight
☐ Minor	☐ Destroyed	☐ In-Flight	☐ Fire at Unknown Time	☐ In-Flight	☐ Fire at Unknown Time
	☐ Unknown	☐ On-Ground	☐ Unknown	☐ On-Ground	☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Damage to aircraft only. Spinner, prop, nose gear, right wingtip damaged. Aircraft came to rest upside down.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Five miles out I called traffic for 31 because turf 22 was closed. AWOS said wind was from 22 at 13, gusting to 18. Five mile final to 31. No traffic in pattern.

Final approach at 50 mph. Flaps 30 degrees. Stall speed in this configuration is 39 mph. Left main touched down first as it should. As the right main touched the runway, a sudden gust of wind relaunched the plane into the air. Airspeed was 50 at left main touchdown. Gust so strong I could not align the ship to the runway. Trying to do so, it settled onto the runway and exited the runway to the left. Margin of runway is thin grass on sand. Nosewheel dug in. Aircraft flipped..

Hanging from the excellent four point harness, I shut off the fuel valve, mags and master. Opened the pilot side door and was outside in only a few seconds. No injuries (beyond personal pride).

No debris field. All damage was to the aircraft, having missed the runway lights.

Aircraft damage is prop strike, nosewheel collapse, right wing tip damaged enough to see wing structure within.

Terrain is level at KJOT no obstructions in and direction for flight operations.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

My better decision would have been to declare an emergency on the radio, then announce landing on the closed turf runway especially because the blimp was not there. The cause for the declared emergency was the 90 degree crosswind with gusts and somewhat variable wind direction.

My personal minimums for this light sport aircraft have always been to land as close to the wind as possible. I chose the wrong conditions for a 90 degree strong crosswind with gusts day.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
