☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Hull is completely destroyed - wings are gone as well - engine dislodged from bay and landed about 30 feet away. Ruddervators are supposedly slavageable

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I taxied over to the end of the grass strip at about 19:40 - waited a few minutes for my engine to warm up. I did a gumps check, then did my run up - both mags had appropriate drop - I checked my carb heat, it had an appropriate drop. I pulled my throttle to idle, the engine did not shut off. I set my altimeter, directional compus, and rechecked all of my gauges. I then made sure Dan had his seatbelt on. Did another gumps check - set my trim then I put the throttle all the way in. I neglected to put any flaps in. I took off, uphill, down the strip. I felt like I was going a little too slow but I passed the windsock (which is the abort point if there isn't 80% power) and had my speed so I rotated. Had I done a better pre-flight and checked density altitude, I would have realized I needed to adjust flaps/speed for the heat/humidity. I don't remember any more of the accident after that point. I know what people have told me they saw, but I just don't remember it for myself.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

After going over a few of the facts with the FAA and remembering - had I done a more thorough pre-flight and included the change in density altitude, I would have not neglected to put my flaps in.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
