- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Impact damage right wing, cowling, propeller, wheel pants, canopy

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On July 17, 2025 I planned a flight 1MN8-RGK-LUM-RNH-1MN8 and getting fuel at RNH. I downloaded a briefing using ForeFlight and review the information. Weather was VFR and calm winds. There were no issues that would affect my flight. I departed 1MN8 just before sunrise and flew to RGK, landing on 27. I departed RGK on 27 and flew to LUM, landing on 27. I departed LUM and flew to RNH with the intent to land on 22. I announced my position and intentions to land at RNH 10 miles out. I observed no other traffic and I entered the pattern on a left base to 22. As I approached to land I noticed I was high and a little fast but thought I could slip to correct. I floated down the runway and soon realized I would not be able to land in the remaining space and I raised the flaps. By then I thought I was too slow to abort the landing before reaching the end. I flew the plane over the remaining ground and into the lake.

Upon landing in the lake at the departure end of 22 the plane flipped upside down. The airplane remained intact.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

I should have advanced the throttle before raising the flaps. I should have aborted the landing before flaring when I realized I was too fast. I have never tried to abort a landing this late into the landing.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

EVACUATION OF AIRCRAFTWas an emergency evacuation of the aircraft performed? ☒ Yes ☐ No

Method of Exit – Describe how the occupants exited and how many occupants evacuated each location:

Upon stopping upside down in the water I unlatched the canopy and seat belt. Crouched upright in the cockpit with my feet against the canopy I tried to open the canopy but could not. I believed the canopy would open when the canopy became fully submerged. After a minute or two I felt the canopy open and one pilot and sole occupant successfully exited the cockpit.

OTHER AIRCRAFT – COLLISION (If air or ground collision occurred, complete this section for other aircraft.)

Aircraft Registration Number

Manufacturer: _____

Damage to Other Aircraft:

☐ Destroyed☐ Minor☐ Substantial☐ None

Model: _____

Registered Owner of Other Aircraft

Pilot of Other Aircraft

Name: _____

Name: _____
