Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Fuselage sheet metal and rotor blades bent and cracked, windshields broke off, signs of damage to main rotor gearbox and fuel system.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Performing hover introductions during discovery flight at T74 over North ramp area. Demonstrated each control and then allowed student to control one axis at a time beginning with pedals, collective, and finally cyclic handing only one control at a time and guarding closely. Was able to use cyclic through a few iterations with no issue, student allowed slow drift and after moving away from initial point, recollected control and moved us back. Last iteration, I was too slow to recollect controls as we went into the dirt area and dipped enough for skid to contact the ground.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Better brief of maneuvers prior to attempting them. Better observation of DA and effect on performance.
