Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

DAMAGE TO BOTTOM SKIN AFT OF STRUT FOWARD OF FLAP SECTION DAMAGE TO RIB LOCATED IMBOARD OF STRUT

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 21 August at approximately 0700L, during the initial climb-out following takeoff from KAFF, the student pilot (SP) of RALLY 14 (N1401E) observed that the aircraft had departed with the chocks hung on the right wing strut. The SP immediately notified the supervising instructor pilot (IP), who then contacted KAFF Tower via telephone to declare an in-flight emergency, on behalf of the student, and coordinate the aircraft's return.

Given the proximity of the chocks to the wing flaps, the decision was made to execute a no-flap landing to avoid any potential interference or damage during flap extension. The aircraft returned safely to KAFF and conducted a no-flap landing on runway 34C without further incident.

This incident was caused by a failure to detect the chocks on the wing on the initial preflight inspection and this action will lead to a more thorough walk around.

Additional Aero Club Manager Remarks:

Student pilot Logan Throgmorton is grounded from solo flight operations until reinstated by 10ABW/CC.

Aircraft N1401E (RALLY14) is grounded pending inspection by maintenance personnel.

In addition to the above, Aero Club Manager has directed a prohibition on the common general aviation practice of hanging wheel chocks on the aircraft struts. This is effective immediately, being communicated to the entire membership via email, and incorporated into the Pilot Information File (PIF). This will also be incorporated into our SOP Supplement to DAFMAN 34-152 during the next re-write. As this was one of two declared IFEs in a single day, Aero Club Manager has directed a self-imposed Safety Stand Down for all Aero Club aircraft and crews the remainder of the day.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
