Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Damage to all 3 landing gear, wing penetration, flap separated from wing, prop blades (3) sheared off, pilot side window broken

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed U68 (North Bighorn County, WY) 11:55 MDT on August 22, 2025 having fueled up the aircraft before departure to KFAR. I picked up my IFR flight plan airborne once at an altitude to talk to Salt Lake Center. I was transferred to Fargo Approach and the ILS 18 was in use, which I elected to use. ATIS was stating winds 250/13 gusting 23. Runway 27/09, a more appropriate runway for the winds, was NOTAMed closed. The ILS approach was a stabilized approach and on short final tower called out final wind speed slight greater than ATIS but I do not recall the exact numbers. I came in with a slip technique, upwind wheel was set down at desire airspeed on runway but the plane was lifted off the runway by the gusting wind from the right, I do not know of the left wheel had touched down yet. The plane was lifted off the runway and sent me to the left, and I elected to add power for a go-around. Next thing I knew the aircraft impacted the ground and was sliding across the grass. Aircraft came to stop and I shut down engine by cutting mixture and turning off fuel tank, all electrical, mags and ignition switch. We then exited the aircraft through respective doors.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Better ADM, I should have chosen an alternate airport to land at with an appropriate runway for the wind. Better go-around technique in heavy crosswinds.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
