

NATIONAL TRANSPORTATION SAFETY BOARD • PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT
REPORT Use this form (Form 6120.1) to report civil and public aircraft accidents and incidents

BASIC INFORMATION
Accident/Incident Location

Nearest City/Place: Ardmore State: OK
 ZIP: 7340 Country: USA
 Latitude: 97.017 Longitude: 34.3011
(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 08/27/2025 Local Time: 21:15
mm/dd/yyyy HH:MM
 Time Zone: CT

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: N5181A

Manufacturer: Cessna

Model: CE-172-R

Serial Number: 17281102

Year of Manufacture: 2,002

Amateur-Built: ☐ Yes ☒ No
If Yes: ☐ Original Design ☐ Kit/Plans

Make: _____

☒ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 2,450 lbs.

Weight at Time of Accident/Incident: 2,122 lbs.

Number of Seats: 4 Flight Crew Seats: _____

Cabin Crew Seats: 2 Passenger Seats: _____

Number of Engines: 1

Category of Aircraft
(Select one)

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible

Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Bent propeller, damaged lower firewall, damaged forward lower keels, damaged lower forward skin, nose tire and wheel. Engine prop strike inspection.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Hannah Gorman is an aviation student at Southeastern Oklahoma State University in Durant, Oklahoma.

On the evening of 27 August 2025, during training event for Commercial certificate, Hannah Gorman was attempting to complete the university's Part 141 Commercial Pilot Flight Lesson Ten - Period Forty-Four. This lesson is a night solo practice flight consisting of at least 2.0 hours and requiring:

- Preflight briefing
- normal takeoffs and landings (at least 10 to a full stop at an airport with an operating control tower)
- traffic pattern entries and departures
- maneuvers and procedures as assigned by the instructor

The flight was to be from Durant Eaker Field (KDUA) to Ardmore Municipal Airport (KADM) for the 10 stop-and-go's, and back to KDUA.

Hannah departed KDUA at approximately 20:50 CDT (03:50 Zulu on 28 Aug 25). The flight was direct to KADM, and she arrived at KADM approximately 25 minutes later. There were at least 2 other aircraft in the pattern for Runway 13 upon arrival and during the duration of the flight at KADM. During the turns from downwind to base to final, there is a significant black-hole effect on the approach end of Runway 13.

The first attempted landing resulted in a go-around due to over-shooting the turn from base to final. The second attempt resulted in a successful stop-and-go. The third attempt at approximately 21:30 CDT resulted in crossing the approach end of Runway 13 at approximately 65 to 70 KIAS, and the aircraft porpoised and bounced approximately 3 to 4 times before coming to a complete stop. Gorman thought that something had been struck on the first bounce and didn't know the extent of any possible damage, thus she did not attempt a balked landing procedure. Upon coming to a stop, Gorman did not hear anything unusual from the engine or aircraft and requested to taxi clear of the runway to allow for inspection. Gorman did not specify to the tower that anything was wrong, just the request to taxi clear. While advancing the throttle to taxi, Gorman could hear that there was a different airflow sound. However, the aircraft was controllable for taxi, as the throttle allowed for normal acceleration and the rudder pedals controlled the nose-wheel as normal. Upon taxiing to the FBO and assessing the damage, it was clear that the propeller had struck the runway and was bent. Additionally, the under-belly was damaged. When trying to install the gust-lock, the elevator cables felt to be rubbing on something, and it unclear if they would have further damage if moved. The aircraft was tied down and left at the FBO, and Gorman flew back to KDUA as a passenger with another Southeastern Oklahoma State University aircraft.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

KADM is a difficult and intimidating airport for solo night operations, especially when landing from the north. Perhaps student training should have placed greater emphasis on the airport layout and the potential for "black hole effect", especially when landing runway 13. We will continue to stress the need to go around during unstable approaches.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
