DAMAGE TO AIRCRAFT AND OTHER PROPERTY**Aircraft Damage**

- ☐ None ☐ Substantial
☒ Minor ☐ Destroyed
 ☐ Unknown

Aircraft Fire

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Damage to front wheel and front leg is bent, right wing support strut is bent, rudder top most section is bent, one prop blade is broken, and engine will need to be examined for damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

This was the third flight of the phase one flight testing. I performed the check list tasks, started the airplane engine, warmed the engine to the proper oil temperature. Taxied to runway 13 and did the engine runup and mag checks. Announced my intentions to the Forest lake traffic, and positioned the plane for takeoff.

Take off was at 2:30 pm from runway 13 at Forest Lake airport. Climbed to 3000 ft and did a series of power off stalls with three different flap settings. Then did slow flight tests (level, climbs, and descents) with the same three flap settings.

Returned to the Forest Lake airport pattern altitude, down wind for runway 13 to do a full stop landing. Did the base, and final legs, and was rounding out preparing to flair when a gust of wind from the right pushed me to the left as I landed.

The plane was then headed to the left off the runway and into the down hill bank that goes down about 4 feet and then abruptly levels out. At that bottom of the bank the front wheel leg bent and dug into the ground. The wheel was now digging into the ground and caused the plane to flip upside down tail over head.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
