☐ Fire at Unknown Time
☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Aircraft struck a tree and flipped over.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Purpose of flight was a prebuy flight test. An initial walk around and inspection of aircraft was conducted. Fuel and tires were serviced, tire inflated to 35lbs and fuel was brought to 5 gallons total fuel on board. a taxi check and runup was conducted, in addition a high speed taxi on runway 27 (favored wind rwy) was conducted. aircraft was taxied back by hangar where owner ran over and jammed in flight book (approx 8"x10") into right side of front seat between frame and fabric). aircraft was then taxied back to runway 27 for take off. Take off roll was normal (approx 300-400') aircraft flew off runway at approximately 25-30 MPH indicated with some right rudder input. After lift off aircraft veered to left off runway pavement and full right rudder was added, I leveled aircraft. Aircraft momentarily flew back over runway. At this point I started to loose aircraft control and aircraft started a left turn which I was unable to stop with full right rudder I was fighting aircraft all the way until impact. I believe the flight book that was put into the aircraft by owner may have jammed up right rudder.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

I believe the cause of the accident was inadequate right rudder authority, this may have been caused by either a jam or limit of travel of the control which caused inadequate authority or travel of right rudder deflection.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
