Subject: CEN25LA391- telephone conversation

Contact: Jesse Day - Pilot

In a telephone conversation with Mr. Day, I asked him if he knew that he depleted the amount of usable fuel in N2500Q on September 19, 2025. He said, yes, he knew that he did after the owner of the aircraft showed him how much fuel was left in the tanks when the owner showed him a plastic water bottle with the remaining fuel in it. Mr. Day said that he was surprised that he ran out of fuel and will use this experience as a lesson learned.

He also stated that he was not instructing during this flight. His passenger was a rated pilot, and they were using this flight to build time. The pilot rated passenger flew the first leg of the roundtrip cross country flight, and he flew the return flight.
