Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

PROP BENT, WINGS DAMAGED FROM GROUND CONTACT AND IMPACT WITH RUNWAY SIGNS. RADAR POD ON RIGHT WING DESTROYED.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Flew VFR solo from home airport in Rockwall Texas on flight following. On descent to KRFI Longview approach notified me of inbound traffic to runway 35. I informed approach I had them on my traffic display, approach cancelled flight following and gave me a switch to the CTAF. I called my position and made radio contact with inbound traffic. Another plane then appeared on traffic display coming off runway 35 and climbing to pattern. I widened my pattern entry and proceeded south looking for the new target. I announced I'd be making a 360 to maintain separation give the plane in pattern time to land. My gear warning horn went off due to power reduction, which I cancelled. At some point I heard them announce position then turn base. I finally picked them up visually while I was a couple miles south, saw I had plenty of room with the inbound traffic from south, proceeded to land on 35. I watched the plane in front of me do a touch and go, lifting off when I was on approx 1 mile final. My plane contacted the runway with radar pod, yawed slightly right, full left rudder wouldn't keep it on runway surface, plane skidded on belly to a stop in grass just beyond taxiway C after hitting two airport signs. I announced the crash on the radio, pulled the firewall fuel cutoff, turned off the master, removed seatbelt, opened the door and exited. I had no injuries. No fire or smoke noted.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

SHOULD HAVE MADE A FINAL LANDING CHECK ON SHORT FINAL. ALLOWED AVOIDANCE OF OTHER INBOUND TRAFFIC TO DISTRACT ME FROM MY NORMAL LANDING PROCEDURES AND FLOW.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
