Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Landing gear collapse. Prop strike. Bent tailwheel and rudder.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We were flying from Greeley to Longmont to come back and complete a routine flight. A miscalculation of fuel quantity and fuel burn lead to starvation of the engine approximately 6 nm from Longmont airport. Our altitude was approximately 1200 AGL leaving no time to troubleshoot the engine. Therefore, I decided to make an emergency landing. I selected the best place to land as a pasture with cows on the far end. At about 500 ft AGL, it became apparent that multiple rivulets / gullies were present that may cause damage upon landing. I maneuvered to avoid the rivulets and then additionally to avoid hitting a fence. I touched down a bit high and with a yaw. The landing gear collapsed on impact and the yaw caused the plane to spin 180 degrees, damaging the tailwheel and rudder. Landing gear collapse resulted in a propeller strike. In spite of the plane damage, last minute maneuvering meant no damage to person or property. Both myself and the passenger got out of the aircraft with no injuries.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
