Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Aircraft caught fire after impacting ground resulting in total consumption of aircraft

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Just before landing at LL07 to the east, as recommended by the pilot on the ground who gave me the last wind report which had picked up from 5-7 to 10 by the wind sock on the field, the wind picked up substantially while in slow flight with full flaps. Recognizing that I would be pushed into a rowed corn field to the north of the runway I decided to go around. The wind continued to gust from the south as I climbed and tried to recover airspeed and altitude. Within a short distance from the runway the wind got under my right wing turning my aircraft more towards the north and putting the wind behind me which stopped my lift and put me in a mostly nose down rapid descent impacting the ground in a unharvested corn field

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

The wind picking up in slow flight, in my opinion, seems to be the reason I was unable to go around. I think a practice low pass over the intended runway would have been a great idea to see if there was winds the sock was not showing.
