☐ Fire at Unknown Time
☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Engine sudden stoppage, Propeller cracked, Engine mount bent, Cowling damaged, Fwd Spar of both wings damaged, All four wing struts bent, Multiple ribs broken in wings, Sliding window cracked, Windscreen cracked, Rear right window cracked, Vertical Stabilizer is bent, Oversized Rudder is bent, Fuel caps vent tubes bent, Comm antenna broken

No damage done to other property.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I departed runway 35 from KAPS at 2:32PM on 10/15/25 in clear VFR conditions for a normal flight simply because it was a beautiful day. The destination was KAPS.

I was using the grass section North of A2, South of A3, East of RW 35, and West of Taxiway A. I am very familiar with this section of grass, as my company has conducted banner towing operations out of it on a weekly basis for the past 9 months. Usable grass runway in that section is 1,000' long by 100' wide. Both I and one of my pilots had landed on it roughly 20-30 times within the weeks leading up to the accident. The grass was best for that plane because the 31" Alaskan bushwheels that were on the plane at the time of the accident get damaged from the torque of landing on pavement.

I was coming in for my fourth normal landing of the day. Upon touching down, I accidentally bumped the brakes, something I do not normally do, which brought the plane's tail up very quickly. The prop struck, and momentum stood the plane up on it's nose carrying it forward to come to rest on its back.

There was no distribution of wreckage as the aircraft remained in one piece, with the exception of the carbon fiber prop spinner which broke into a couple pieces.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Know where my heels are in proximity to the brakes, and only touch the brakes once the stick is all the way back and the tail is on the ground.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
