Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Rotor, prop, tail, right wheel blew out, canopy, right wheel spat.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

December 23 2025 was great calm sunny low wind day. I went up to practice for my maneuvers. Toucvh and go's, turns around a point, ascending and descending turns. i flew for about an hour and decided to come in, landed. taxied off the runway and decided to one more take off and go around the pattern one more time and take it in and go home.

I taxied back to the begining of the runway with the rotor still spinning watching my rotor speed keeping it above 100rpm. At the threshold made my call out my rotors stil about 117rpm taxied on the runway royoy speed still looked good accelarated to start building rotor speed pitching back slightly. i herd a loud pop. Thinking i may have blown a tire on my right main. Glanced to see if i could see if it had. Turned to check the rotor speed and it had dropped down to about 80rpm.at that same time the aircraft started to shake. Before i knew it, it started to turn over on it's right side. I was not hurt. I turned off the engine.I made a Mayday call that i turned on my side and waited for help to arrive.

When help arived we broke the canopy so i could get out upon walking around, my tail section was broken the prop was broken all within the ares where it tipped over.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Not sure, it all happened so fast.

Possably as soon as I herd the pop, insted of looking to see what the noise was. I should of started to abort the take-off. Stick foward pull power if i could of been quick enough. It happened so fast.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
