Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Broken landing gear, Broken wing strut on left wing, bent two fence post on fence next to runway torn fabric on left wing. I have not seen plane since accident.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I inspected the plane in the hanger and then took it out of the hanger. I did a walk around inspection once outside the hanger. I started the engine and warmed up the engine. I listened to weather info on radio and decided to do some high speed taxiing and try some crowd hops to get a feel for the plane. After some taxiing I decided to do some crowd hops at this point I was headed south down the runway just over halfway of the asphalt portion the plane lifted and went hard to the left. I went full power at this point and went airborne and into the pattern. The turbulence was extremely rough. I circled to the left and lined up to try and land from the north end. The plane just hung in the air and did not want to settle down so I went back into the pattern and tried to approach from the south. The turbulence was very bad and bouncing me all over the place so I went back into the pattern once more and tried again from the north. Things were looking good this time. I got down about 30 feet above the runway near the end of the asphalt and was hit with a downdraft and was pushed down flat. I tried applying full power to pull out but the plane hit flat and skidded off the right side of the runway and did a 180 and stopped next to the fence. I turned off the engine and all electronics. I undid my seatbelts and climbed out.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
