DAMAGE TO AIRCRAFT AND OTHER PROPERTY					
Aircraft Damage ☐ None ☐ Minor		Aircraft Fire ☒ None ☐ In-Flight ☐ On-Ground		Aircraft Explosion ☒ None ☐ In-Flight ☐ On-Ground	
☐ Substantial ☐ Destroyed ☒ Unknown		☐ Both Ground and In-Flight ☐ Fire at Unknown Time ☐ Unknown		☐ Both Ground and In-Flight ☐ Fire at Unknown Time ☐ Unknown	
Description of Damage to Aircraft and Other Property <i>(Use additional sheet, if necessary.)</i> Most damage was contained to the center fuselage forward of the wing section. Minor skin damage and scrapes. 3 bent prop blades. Engine damage TBD.					
NARRATIVE HISTORY OF FLIGHT <i>(Please type or print in ink.)</i>					
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.					
My name is [REDACTED] I have been flying airplanes since 1970. Among other things, I was a United States Air Force (USAF) Pilot and Flight Instructor since the Vietnam War. After graduating from college and serving in the USAF, I continued flying as a hobby and eventually purchased my own airplane, a 1960 Piper Comanche. In addition, as an instructor in the USAF, I feel in love with instruction and did quite a bit of civilian instruction over the last seven to ten years. On January 8, 2026 I was flying my Piper Comanche for some skill training. Due to the lengthy poor weather conditions along with the holiday activities I hadn't flown for several weeks. I leapt at the opportunity to take 7085P on a brief flight close to my home base at James Clements Airport (3CM) in Bay City, Michigan. On 1/8/2026, the weather couldn't have been better. There were light winds (around 5 knots) down runway 18. I decided to do some traffic pattern approaches and landings. Although I flew a quick tour of the surrounding areas, I really wanted to complete traffic patterns and landings. I choose this mostly because, as a DPE, I see some wild traffic patterns and landings. It is a weak spot for many applicants. With the winds almost directly from the south, I choose to fly patterns and landings on runway 18 (see attachment explaining/displaying landings 1 and 2). The light winds down the runway made for comfortable conditions. The first two patterns and landings were near excellence, despite the lengthy time since my last flight. I should also mention that I only fly patterns and landing with the objective of flying. Only landings to a full stop and taxi back. I don't advocate touch and go's for less experienced pilots and/or students. On this day and the lighter winds made for a perfect practice on runway 18. With this in mind, I mentally prepared for where I would aim for the landing. My normal target is generally 30' or 50' from the approach end of the runway. With the light winds on 1/8/26, I choose the 30' target. Given my intimate knowledge of 3CM and runway 18, I could easily slow the landing aircraft to allow for a turn off just past the intersection of runways 05/23 and 18/36 (see attachment explaining/displaying landings 1 and 2). This approach worked perfectly for the first two patterns and landings. The third landing did not work out nearly as well. The approach was normal with airspeed and power settings almost identical to the previous two approaches and landings. During this approach to landing however, the aircraft after touchdown began to pull to the right. Airspeed and controls seemed to be comparable to the two earlier landings. I began to have to fight the nose to stay left. As a result, the aircraft was not slowing down as in the previous two landings. I believe the single green light was on during this portion of the landing, but I can't be 100% certain). Consequently, I had to apply considerable pressure on the left rudder, which resulted in the aircraft facing almost perpendicular to the runway and it was on the right-hand side (west) side of the runway (see attachment explaining/displaying landing 3). The nosewheel collapsed at that point. The 3-blade propeller was damaged. Approximately, four hours later, the aircraft was taken to my local hangar at 3CM.					
OPERATOR/OWNER SAFETY RECOMMENDATION <i>(How could this accident/incident have been prevented?)</i>					
Unable to answer this section as do not know the cause yet.					

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

The nose wheel collapsed as the aircraft slowed down upon landing.

Total Time/ Cycles On Part

_____ Hours

8 _____ Cycles

Time Since This Part Inspected/Overhauled

14.8 _____ Hours**FUEL & SERVICES INFORMATION**

Fuel on Board at Last Takeoff

(Convert from pounds, as necessary)

Approx 20 _____ Gallons

Fuel Type

☒ 100 Low Lead☐ Automotive☐ Jet A☐ Jet A-1☐ Unleaded AV☐ Other, specify _____

Other Services, if any, prior to departure:

None - except for pre-flight

EVACUATION OF AIRCRAFTWas an emergency evacuation of the aircraft performed? ☐ Yes ☒ No

Method of Exit – Describe how the occupants exited and how many occupants evacuated each location:

I was the only soul on board. After I was able to stop the aircraft. I shut down all the electrical items, released the door latch and exited the aircraft. No issues.

OTHER AIRCRAFT – COLLISION (If air or ground collision occurred, complete this section for *other* aircraft.)
