Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Right wing Brake off at Inboard main tank, Prop
Strike to 2nd Escalade

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The morning of January 15 I had the aircraft topped off with fuel and the FBO had my debit card for the transaction. I started the Aircraft to warm up as the temps were in the 30's. While the Aircraft was warming up the parking brakes were set and Engine was set to Idle at 700 RPMs. I proceeded to load the aircraft with our luggage. I asked my passenger to get in the aircraft as soon as we secured the luggage and if anything happens to pull the Red plunger style fuel mixture but assured her that the brakes were set. I then proceeded to get my Debit Card from Inside the FBO and use the Restroom, 50' feet away. Within that two minute time frame I heard the aircraft RPMs Increase and it taxi into the Escalade 75 yards away and the proper impact killed the Engine.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

As PIC, I should have Never put a passenger who is not a pilot in the position to sit with a running aircraft that ultimately led to the Incident. As 137 Certificate holder I let my SOP's from Ag ops bleed into Part 91 ops and In-Piston Aircraft. I have taken this moment to reflect and schedule Remedial 91 training with a CFI as well as Enrolled in Wing Carrier
