Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Nose wheel damage, fire wall damage

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Narrative submitted by PIC, [REDACTED] in a safety ticket: Tower cleared us to take off RWY17. I lined up, using most of the available RWY and configured for a short-field takeoff. I held the brakes, set power to full, and voiced and checked engines in the green. Once all clear, brakes were released, airspeed was alive and we rotated at 51 to climb at 60 Vx. At 100' above the ground I leveled off and began the descent back to RWY17. Power idle, elevator forward to descend back to the runway. Once close enough, I noticed the airspeed was 68 kts and began to round out and pulled hard on the yoke towards my chest. This said, the plane and the flight controls seemed heavy and the plane kept descending fast. As I fought for a nose high attitude the plane hit the ground hard and flat. Soon after landing, I notified tower that we would need to taxi back to USAA. They said to taxi off at C, crossing 31 and to contact ground. I did such and they gave me taxi instruction back to USAA. Once back and parked I contacted USAA MX and [REDACTED] The plane has also been downed. (Squawked)

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

Adherence to published maneuver procedure and profile for the maneuver being performed.
