

NATIONAL TRANSPORTATION SAFETY BOARD • PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT Use this form (Form 6120.1) to report civil and public aircraft accidents and incidents

BASIC INFORMATION
Accident/Incident Location

 Nearest City/Place: Augusta Municipal Airport, Augusta State: KS

 ZIP: 67010 Country: USA

 Latitude: N37 40.19 Longitude: W 97 04.68

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

 Date: 01/31/2026 Local Time: 09:50
 mm/dd/yyyy HH:MM

 Time Zone: Cent

 Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

 Registration Number: N767VK

 Manufacturer: Textron Aviation

 Model: CE-172

 Serial Number: 172S13021

 Year of Manufacture: 2,023

 Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Original Design ☐ Kit/Plans

Make: _____

- ☒
- IFR-Equipped and Certified
-
- ☐
- Commercial Space Flight
-
- ☐
- Unmanned Aircraft

 Maximum Gross Weight: 2,558 lbs.

 Weight at Time of Accident/Incident: 2,065 lbs.

 Number of Seats: 4 Flight Crew Seats: 2

 Cabin Crew Seats: _____ Passenger Seats: 2

 Number of Engines: 1
Category of Aircraft
 (Select one)

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Aircraft came to rest inverted. Damage to both wings, tailcone, empanage, engine, prop, spinner, cowling and wheel fairings.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Saturday, I arrived at my home airport KBEC at 7:30 AM. I did the preflight and checked all the documents (endorsement, logbook, driver's license, medical certificate, student pilot certificate) I needed to have on board with me. My instructor arrived at 7:45 AM and checked in with me. He asked me if I had all the required documents for solo and I confirmed. We talked about the plan for the day. We would be going to Augusta (3AU) and practicing 3 landings and 1 go-around. He would then depart the aircraft. I would do the checklist items again, restart the aircraft, and do 3 landings (full-stop) utilizing the parallel taxiway to have full runway length and 1 go-around on my own. I checked weather and NOTAMs and gave him my dispatch sheet. He walked back to the office to deposit the dispatch sheet. We then pulled the aircraft out of the hangar, did a walk-around of the airplane, checked fuel caps and oil, and boarded the aircraft. We departed KBEC at 8:10am, we flew in the VFR corridor to 3AU, checked weather for 3AU, and switched frequency to UNICOM at 3AU from KBEC traffic/tower frequency. We then positioned for a midfield right downwind entry for Runway 36. We entered the pattern, and I did 2 takeoffs and 3 landings with 1 go-around with my instructor at 3AU. After the last dual landing, we exited the active 36 at A1 and taxied to the ramp in front of the FBO. The runway was clear, but there was snow piled up on the sides and it was very cold day. The METAR at 3AU at 1535Z on January 31st, 2026: METAR K3AU 311535Z AUTO 0000KT 10SM CLR M13/M20 A3067 RMK AO2
My instructor showed me where to do the run-up and we discussed where to taxi and exit, and he suggested I also look at the diagram on the MFD. He said he would be monitoring the radio frequency at 3AU and suggested I should be looking for traffic and also include "student solo" in each call so traffic at 3AU is aware. We both then went inside the FBO. I used the restroom and exited the FBO. I did a brief walk-around, checked oil and fuel caps, checked weather at Augusta again, wrote it in my iPad scratchpad, did run-up checklists, and started around 9:00 AM. I taxied to A3, looked visually for traffic, made radio calls, and departed and did my first takeoff. Everything seemed normal, and I did my first landing full stop and exited the active 36 to the taxiway. I was taxiing on the taxiway and heard a call on the radio. I realized the airplane (traffic) was on base, so I waited for a few minutes and let him land and then departed for my second takeoff. I landed full stop, kept in mind the traffic, and made radio calls to keep them aware, and taxied to A3. I did my third takeoff and I was aware there was traffic in the pattern, and I continued my radio calls. When I was on final, the PAPIs looked great—2 white, 2 red. At this point since there was traffic in the pattern, and since I had a decent glide path, I decided to land. (third landing). I still had one go-around to practice for my solo, so I decided to do my fourth takeoff. I saw and heard the traffic depart toward the north at this point, so I decided to take off for the fourth time. I did final checks, followed all instructions, entered the runway at A3, got on centerline, then applied full throttle at once. The airplane started drifting left towards the left edge of runway on the take off roll and to save it from going in the snow, I rotated and tried to make it fly, it was partially airborne, I remember touching down and then applied brakes to stop it, however it flipped then. I don't recall exactly when I pulled the throttle. I immediately called my instructor at 9:51 AM and told him I flipped and alongside I was able to check the throttle idle, mixture lean, mags off, and fuel shutoff valve off. I struggled a bit with unlatching my seat belt, unlatched it and got out of the aircraft. My instructor was running and arrived quickly from FBO. He located me, confirmed I was okay, and gave me a hug. He called the flying club manager on his way and got the pickup process started.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Maintaining direction control on takeoff.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

Total Time/ Cycles On Part

_____ Hours

_____ Cycles

Time Since This Part Inspected/Overhauled
