On 2/11/2026 at noon I preflighted N314VV. Everything checked normal. After doing the run-up at Signature ramp I did a normal taxi to runway 23 and held short @ P3. I was cleared ~~for~~^{to} take off for touch and go's. My takeoff was normal. Did right pattern for runway 23, landing & take off was normal. On right crosswind ATC diverted me to extend downwind for runway 31.

I was then cleared to land. On final I was slightly low, papi read - 1 white, 3 Red, my airspeed 68Kts. A slight crosswind pushed me down, so I added a little power, to correct the approach for a normal landing. ~~After three~~ I reduced power when I was over threshold where I experienced ground effect and floated for a while. Causing a harder landing where I bounced slightly. After 1 bounce the second time I thought I could stop the fire aircraft by applying brakes. After 3rd bounce the aircraft veered left off the runway. I tried avoiding the 2 sign marker sign by slamming right brake but lost control. While ~~being~~ coming to a complete stop I shut everything down as trained and quickly as possible then evacuated the aircraft.
