Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

The following damage could easily be observed there is likely additional hidden damage. Right wing dented/wrinkled at 2 outer bays. Propeller and spinner destroyed. Canopy and windshield destroyed. Cowling punctured. Fuselage bent and skin wrinkled behind aft passenger. Firewall wrinkled. Vert. stab and rudder destroyed. Elevator and horiz. stab dented in multiple places. Engine had sudden catastrophic stop internal condition unknown.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was approach 33TE flying a typical pattern for landing runway 36 on an uneventfull return flight from T20. There were some gusts obseved on final with cross wind from the west. No weather observation station is available at 33TE so no exact wind data at 33TE has been recorded. The airplane touched down normally for a wheel landing. The wheel landing proceeded normally until suddenly the tail came up shortly into the roll out (tail wheel was still in the air). I immediately moved the elevator all the way back but that was not sufficient to counteract the momentum of the tail leading to a flip over with the airplane coming to rest upside down trapping myself in the cockpit. Emergency responders happen to be close by observing the accident and started on the process of extracting myself immediately. The ELT activated and I was contacted via phone by the emergency response center while still trapped in the airplane. I declined help as first responders were already on scene.

The wheels were moving freely after the accident.
