Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Damage to the bottom of the aircraft, prop, as it slid across the ground.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

During the flight everything was normal. I the instructor and my student [REDACTED] had briefed that we would depart to the SW of KFCM. We grabbed weather through foreflight. We departed at around 4:30 pm. At around 5:30 pm we started doing power off 180s in the pattern at KGYL. We had done 3 laps in the pattern. On the 4th lap on the downwind my student brake sterile cockpit. I, the instructor got distracted not checking if my student had put the undercarriage down. Upon flaring, it was too late for us to realize the gear was not down, we had done a gear up landing.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

- Don't brake sterile cockpit in the pattern / critical phases of flight.
