☐ Minor	☐ Destroyed	☐ In-Flight	☐ Fire at Unknown Time	☐ In-Flight	☐ Fire at Unknown Time
	☐ Unknown	☐ On-Ground	☐ Unknown	☐ On-Ground	☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Aircraft wings and flight controls damaged beyond repair
 Fuselage wrinkled and caved in near trailing edge of flaps
 Wing root and flaps caved
 taxi & landing lights cracked and broken/ INOP
 Airport main access gate bent

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was in front of the accident aircraft in another aircraft (N901SJ) taxiing north on taxiway A, holding short of 13. The accident aircraft was suppose to be following behind my aircraft via instructions from Topeka Ground. Accident aircraft then turned west bound off of taxiway A and proceeded west through a row of hangers onto the main vehicle access road that leads into the airport. Accident aircraft then continued south, crashing into the aircraft main access gate. Accident aircraft then called Topeka Ground and notified them that he had hit a fence. I then notified Topeka Ground that I was taxiing towards the accident aircraft. I notified tower that I was exiting my aircraft. I then made my way on foot to the accident aircraft and attempted to open the pilot side door. The pilot door was initially stuck due to the left wing being crushed. I had to rip the door open via force, scraping the bottom of the wing. I then assisted the student pilot in exiting the aircraft and ensured the fuel was shut off and magnetos were off. I then directed the student pilot from the accident aircraft to emergency services who had arrived on the field.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Follow taxi instructions given by Ground
 Request progressive taxi if confused on directions
 Stop the aircraft if unsure of location, call for help
 Not taxi the aircraft down a road
 Be aware that an aircraft has wings and cannot fit through a vehicle gate

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
