

27 MAY 26

From: [REDACTED]
To: HELICOPTER INSTITUTE

Subj: INCIDENT STATEMENT

After departing from KFTW to KAFW and entering the pattern we began to practice Hovering. After several tries, we once again set up for a hover, I then took controls. As I had controls we started to veer to the right. Once this happened, my instructor said "My controls" and in that moment the helicopter rolled. Once the helicopter stopped moving, I looked to my side and my instructor was unconscious. I then unbuckled and crawled out from a broken window. Once there I dialed 911 on my phone and proceeded to check on my instructor. I then helped him remove his seatbelt and with his aid pulled him out of the helicopter. From there I remained on the phone with emergency services until they arrived. During this time my instructor returned to the helicopter to pull the fuel and turn the battery off. EMS arrived shortly after.

VERY RESPECTFULLY,

[REDACTED]
