**NARRATIVE HISTORY OF FLIGHT** (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Typical Aerial Application mission - ferried to field applied load. Returning to the base for Load #2. The engine stopped running. Pilot initiated auxiliary fuel pump but prop had already feathered AND not enough altitude was left for a start. Landing choices were poor. A small hay field in a narrow valley provide several hundred yards of space. The field proved very rough AND the aircraft did not slow significantly. Approaching a steel dividing fence. Pilot used the last of the lift to raise aircraft AND bounce it off the ground to clear fence. The next valley was 70° off the first. The pilot tried to turn the aircraft left to use the remaining space. Brakes were not very effective because of rough ground. The options were an open pit mine to the right AND a narrow passage between a tree & a fence line <sup>(left)</sup>. The RT wing impacted the branches of the tree and the aircraft spun to the right and stopped. The prop never touched dirt.

**OPERATOR/OWNER SAFETY RECOMMENDATION** (How could this accident/incident have been prevented?)

The fuel screen in the right wing tank had broken from the outlet fitting and flecks of wing sealant had plugged the outlet. A moment of uncoordinated flight cause the engine to suck air. We drained almost 40 gallons fuel from the wings enough for almost 1 hours flight. I had 6 minutes until I was at base. Check all wing tanks to assure all fuel screens are in place each season AND remove any loose fuel tank sealant.

**MECHANICAL MALFUNCTION/FAILURE** (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
