**Description of Damage to Aircraft and Other Property** *(Use additional sheet, if necessary.)*

Severed powerline, broke power pole, swathed a pass of farmer's corn in the field, completely destroyed aircraft altogether.

**NARRATIVE HISTORY OF FLIGHT** *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Was late in a full day of crop dusting nearby fields, after emptying load, did surveillance pass around new field for obstacles, had cleared out electronic locating for previous field while sitting on ground being reloaded with product, then went to east edge of new field to establish mapping swath lines, started from north end and turned on sprayer to establish first point, sprayed full pass to south road as i climbed over power line at end. After turning sprayer off, realized it was still established on previous field's swath lines, so i then climbed to a comfortable altitude to reset lines, then approached next pass over from field edge, this time coming from south side at approx 60 knots. a fair size tree was on the left of my swath pass, which i was giving adequate attention to clear, and as approached near tree I then saw a flicker of wire and flared as hard as possible just a split second prior to catching skid on wire and tearing it off poles and breaking line. Helicopter remained flying at that point, but kept drooping RPM as I worked collective and throttle to regain RPM multiple times, eventually had to enter autorotation as I reached top of corn without being able to maintain RPM without losing altitude, so then flared smoothly into corn and slid through the field on skids what seemed several seconds and nearly to a stop, still holding the hope of keeping the ship upright and intact, then just prior to stopping forward motion, blades sunk into corn and as they hit the corn, the helicopter thn was torque slammed and destroyed, after which it left me hanging from my seatbelt on upper side as it lay on its side. As it stopped I remember reaching behind with my left hand and after minimal search i founf fuel cutoff and turned it, though the spray pump continued to blare for a few seconds following, which also sprayed chemical all over.

I immediately unbuckled and extracted myself, climbed on top of wreckage to be able to see over corn crop to determine where to go to get out just as local farmer arrived in clearing about 50' further north. I then got on his pickup and he took me a few hundred yds to his shop where i drenched off and shortly afterward showered into some dry clothes as EMS arrived. I then was persuaded to go get checked out at hospital for any trauma injuries, which were not sustained.

**OPERATOR/OWNER SAFETY RECOMMENDATION** *(How could this accident/incident have been prevented?)*

Better attention to obstacles and more thorough scan of the area, as well as steeper approach into fields even if we think there is not wires at edges

**MECHANICAL MALFUNCTION/FAILURE** (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
