

NATIONAL TRANSPORTATION SAFETY BOARD • PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT Use this form (Form 6120.1) to report civil and public aircraft accidents and incidents

BASIC INFORMATION
Accident/Incident Location

 Nearest City/Place: Glenwood Springs State: CO

 ZIP: 81601 Country: USA

 Latitude: 39.5100° N Longitude: 107.3117° W

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

 Date: 05/03/2026 Local Time: 13:00
mm/dd/yyyy HH:MM

 Time Zone: MT

 Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

 Registration Number: N2904R

 Manufacturer: Piper

 Model: PA-28-236

 Serial Number: 28-7911237

 Year of Manufacture: 1979

 Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Original Design ☐ Kit/Plans

Make: _____

- ☒
- IFR-Equipped and Certified
-
- ☐
- Commercial Space Flight
-
- ☐
- Unmanned Aircraft

 Maximum Gross Weight: 3000 lbs.

 Weight at Time of Accident/Incident: 2600 lbs.

 Number of Seats: 4 Flight Crew Seats: 2

 Cabin Crew Seats: 2 Passenger Seats: 2

 Number of Engines: 1

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Wing hit fence while taxiing. I'm still getting more information from the repair shop

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The trip began as a mountain flying instructional flight departing from Rocky Mountain Metropolitan Airport with [REDACTED] serving as flight instructor.

[REDACTED] piloted the first leg of the flight. He landed first at Granby-Grand County Airport (KGNB) and then continued to Glenwood Springs Municipal Airport (KGWS), where he also completed the landing.

After refueling at KGWS, Ken moved to the rear passenger seat and I moved to the front left pilot seat in preparation for the next leg of the flight.

Weather and visibility conditions at the time of the incident were clear with good visibility.

Upon engine start and taxi at KGWS, the initial plan was departure from Runway 14, which is the airport's preferred departure runway. Due to wind conditions, we changed plans and elected to depart from Runway 32 instead.

This required repositioning via the taxi route adjacent to the self-service fuel area in order to return to the taxiway leading to Runway 32.

The aircraft was moving at a slow taxi speed.

After passing the fenced fuel area approximately 15–20 feet, or roughly three-quarters of the way beyond the fuel area, I initiated a turn back toward the taxiway alignment. During the turn, the aircraft's wing contacted the fence surrounding the fuel area. Following the initial contact, the aircraft pivoted toward the fence, resulting in additional contact with the fenced area.

The aircraft was brought to a complete stop through throttle reduction and braking. There were no injuries. Weather and visibility were not contributing factors in the incident.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Prevention measures identified following the incident include conducting a more deliberate visual clearance assessment before initiating turns in confined ramp or taxi areas, requesting external guidance or wing-walking assistance when maneuvering near obstacles, and allowing additional taxi distance before beginning turns in order to improve wingtip clearance margins. The incident also reinforced the importance of maintaining heightened awareness of wingtip tracking during low-speed maneuvering around fixed objects.

Additional airport surface markings, centerline guidance, or signage around the fuel containment area may help improve taxi routing clarity for transient pilots. The current fuel area configuration requires aircraft to maneuver around the caged fuel enclosure in an area that may visually resemble a continuation of the taxi path, particularly for pilots unfamiliar with the revised airport layout.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
