Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)					
Landing gear removed. Longerand bent. Skin Damage.					
Narrative History of Flight (Please type or print in ink.)					
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.					
I was practicing landings at 9G2. Weather was perfect. No wind. During my landing rollout on 27, Three deer ran across the runway. I accelerated and pulled back on the stick. There was a loud bang. I knew I hit one of them, but was un aware of the damage. I remained in the pattern and came in for a landing. Upon touchdown, I became aware the right landing gear was missing. The plane veered to the right, a runway marker sign took out the left gear and I skidded to a stop on the grass.					
I was heartbroken, but not hurt. The deer was dead. An individual was there, but didn't see the accident. He took me to his home where I called my wife for a ride. The event happened at about 10:30 and I met with the FAA at 2:30.					
The plane was based at Dalton 3DA in Flushing, Michigan. I use Linden Price often to practice, because it has a 4000 ft runmway, is somewhat rural, and is only 2 miles from my home.					
Operator/Owner Safety Recommendation (How could this accident/incident have been prevented?)					
I don't think there could have be a recommendation. The airport has a fence 100 feet south of 27. There isn't an airport in Michigan that isn't subject to deer strikes.					

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No
