Subject: CEN26LA291

Contact: [REDACTED] 9G2 Airport Manager

Contacted the manager of Price's Airport (9G2) by telephone. The manager stated that there is a fence along the south side of the airport; however, it does not extend around the entire airport perimeter. He noted that a pond located north of the airport attracts deer and other wildlife.

The manager described the airport as a fly-in community. Several flight schools also use the airport for training operations, averaging approximately 4 to 5 flights per day.

Due to peak wildlife season, we discussed the potential issuance of a Notice to Airmen (NOTAM) to alert pilots to increased deer activity in the vicinity of the airport. The manager agreed and coordinated the issuance of NOTAM LAN/239, "*Deer activity increased adjacent to Runway 09/27*" with an expiration date of November 20, 2026.

End of call
