This statement is provided at the request of the Chief Pilot's Office.

I was the Captain on flight 2526 from BZN to SLC on 30JUN15. After landing in SLC the Lead Flight Attendant called us on the interphone to say that we would need Paramedics to meet the flight for one of our passengers. We were told that one of the Flight Attendants had accidentally run over a passenger's foot with the beverage cart during flight and the passenger needed assistance and possible medical treatment. We called SLC operations and made the request for the Paramedics. The Paramedics met us at the gate and treated the passenger.

I acknowledge this statement may be released to the National Transportation Safety Board (NTSB).

This statement is provided at the request of the Chief Pilot's Office.

I was the First Officer on this flight to SLC. After we landed I received a call from an F/A saying that we needed to call for paramedics. I asked the F/A what the issue was and she told me that another one of the F/A's had accidentally run over a passenger's foot with a cart. I told the Captain and then called SLC operations to request assistance. The paramedics were at the gate when we arrived and they were treating the passenger as we deplaned. I had no knowledge of this incident until they called us on the ground in SLC.

I acknowledge this statement may be released to the National Transportation Safety Board (NTSB).

Main cabin flight attendants working beverage cart hit a passenger foot with cart. I did not observe this as I am flight leader and was working first class. Flight attendants gave passenger ice and asked for if she would like a Dr to see her, she said no to the aft working flight attendants and seemed fine; then during a follow up she changed her mind. Dr suggested she get an ex ray. After sterile cockpit and landing she decided she wanted EMT to meet the flight. Captain requested all passengers deplane first and she was looked at on the airplane. However while passenger deplaned she got her luggage and seemed fine from a far. Once EMT got to her she started to cry and told them she took a valium before the flight. They transported her off on an aisle chair. The top of her foot did appear to be a little swollen.

As the in-flight service was beginning, a full size cart was being pushed up the aisle. I was leading the cart saying "excuse me, cart coming through, watch your elbows," etc. I had my back to the woman (Clare Parsons, seat 28C) who was struck by the cart. The passenger had her legs crossed with her left foot protruding into the aisle when the cart made contact with her foot and smashed her foot into the seat in front of her. We brought her a bag of ice for her foot, as she was in a lot of pain. She did not want us to page for a doctor on board initially. We discontinued the service as we were beginning to descend, and Raquel (FA) checked on her again, and at that point she wanted a doctor. The doctor advised her to get xrays of her foot as soon as possible. He asked her if she needed anything for the pain, but she said no, that she had already taken something. She had also told some passengers around her that she had taken a valium before the flight. I asked her if she wanted EMTs to take a look at her once we landed, and she said yes. EMTs met the flight and took her off the aircraft.

While pushing the beverage cart towards the front of the aircraft to begin our service, Laurel pulled and guided the cart as I pushed. As we were coming through the cabin, Laurel gently warned of our cart coming down the aisle so customers could move their body parts out of the way. As we passed row 28, the female passenger in seat 28C cried out as her foot wedged between the cart and the seat in front of her. We immediately pulled the cart back to the galley, out of the aisle's way, so that we could better assist this passenger with her injury. We gave her a bag of ice and asked if she wanted medical assistance. At first she refused but later in the flight she requested medical assistance. Luckily many people responded to the PA request for help. Male passenger 24D was closest. He said he was a surgeon and wouldn't mind taking a look at 28C's injury. 24D turned down my offer to FPOC his helpfulness. The passenger seated across the aisle in 28D said that he gave 28C Advil for her pain. Passenger 28C later agreed to being seen by paramedics once we landed. All passengers deplaned before paramedics made their way down the aisle to see passenger 28C. 28C told paramedics that she had taken a Valium before today's flight.

As flight attendants were pulling their beverage cart into the aisle a passenger was hit in the foot. I was getting ready to pull my cart into the aisle when the other cart pulled back into the galley and said they needed ice for a passenger because her foot was in the aisle. They asked her if she would like Dr's assistance and she said, "no". As I was picking up trash she asked me if I would page for a DR. We paged for a Dr to assist the passenger and he recommended that she get an xray. We then asked her if she would like EMT's to meet the flight and she said, "yes." When we arrived at the gate she took her roller bag out of the bin and I asked her to stay in her seat until the EMT's arrive. As the EMT's were asking her questions she started to cry and let them know she was terrified of flying and let them know she took a Valium before she got onto the flight. The passenger was transported off the plane on an aisle chair and the last time I saw her she was sitting in the gate area getting questioned by the EMT's.
