

Internal Memorandum

Date: 9/18/2017

From: Jennifer Lamar

Subject: NTSB Investigation: Flight 2121 04-September-2017 ALP-ELP MD90 N938DN (9238)

On final descent I was doing my safety checks and walk through and just before getting to the mid jumpseat we hit clear air turbulence. I hit the right side of my head so hard I thought I was going to pass out, but I didn't. When I hit my head so hard it broke my upper back teeth. I made it to my jumpseat and buckled in. As soon as we landed I had to go in the bathroom and throw up. Sharon, the mid flight attendant paged for a doctor as passengers were deplaning. She also called the flight deck for them to call medics.

I acknowledge this statement may be released to Delta Flight Safety and the NTSB.

Regards,

Jennifer Lamar
