NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

NKS 265, an Airbus A321, Reg N670NK was a regularly scheduled flight from Atlantic City, KACY to Ft. Lauderdale, KFLL with a crew of 2 Pilots and 5 Flight Attendants. A non-revenue Spirit Flight Attendant was also on board. There were 95 passengers. The flight was proceeding normally until descent, when at approximately 10,000 ft, turbulence described as severe was encountered. The turbulence encounter occurred shortly after the flight entered IMC conditions. The seat belt sign was illuminated but Flight Attendants were conducting their final compliance checks when turbulence was encountered. As a result one Flight Attendant received a serious injury to his left ankle in the form of a medial and posterior malleolar fracture. All Flight Attendants were attended to at hospital and released including the Flight Attendant who sustained the serious injury. He will follow up with doctors for treatment.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

Review of both Flight Operations and Inflight guidance regarding anticipated and unanticipated turbulence encounters will be conducted.
