

Internal Memorandum

Date: 07/25/2018

From: Karen Simpson

Subject: NTSB Investigation: Flight 2133 23-JUL-18 ATL-CLT MD-88 N918DE (9018)

The captain called to inform us of bad weather as we approached CLT. He told us to wrap things up and prepare for landing and remain seated for the rest of the flight. Daphyanee Smith and I were seated on the aft jumpseat. As we got up immediately to do so, he made an announcement to the passengers as well. We made it to the area near the window exits and a moderate jolt of turbulence occurred. We both immediately crouched down to armrest level. She stooped and I dropped to my knees and suddenly the airplane dropped again and we flew into the air several feet. She landed on her bottom and I on my knees.

I acknowledge this statement may be released to Delta Flight Safety and the NTSB.

Regards,

Karen Simpson
