Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

The aircraft suffered significant damage to the landing gear, tires and underside of the fuselage due to striking a garbage dumpster that had blown on to runway runway 25R during the take-off roll. The aircraft rejected the take-off and stopped on the Runway, with no further damage incurred.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Statement from the Captain of Flight :

Block out 1047, TOW 662.7 Flaps 20 25R F . Tower winds out of the N 16 G24 (my memory). Take off roll 1106, I was PF, after the 80kts call but before 100kts (V1 was 131) I noticed, in the turn off lights, a "large" object moving right to left at a good speed. A fraction of a second later it was in the taxi light going under the nose, I saw it as square and black and thought it was a ULD, but hoped it was a cardboard box. The impact was loud and the aircraft "settled" . The take off was rejected per company procedures, the vibration was severe and made reading the airspeed difficult. We came to a stop before B6. Tower was notified and reported no sign of fire. We requested emergency equipment and I advised the passengers of a possible evacuation, then shut down the engines. Emergency crews were there almost immediately and advised no fire, leaks, or immediate threats. We were advised that besides destroyed nose tires there was damage to the belly and debris on the runway. Maintenance changed the tires so we could be towed back to the ramp. Upon leaving the aircraft there was still debate as to the nature of the object.

The Los Angeles Airport authority's have determined that the object that N703CK struck was a Garbage Dumpster, ownership to be determined.
