15. Certification/Recertification

I certify that this employee meets qualification requirements and is capable of working under general supervision.

Signature of Certifier: [redacted] Date: 9/6/15

Appendix 32. Radar Certification Checklist

SEP 11 2015

ATCS Name: Winston OS: Bishopp

RADAR CERTIFICATION CHECKLIST

Within **2 months** following the month of certification on the **first two** radar positions, a one-day Traffic Management Unit (TMU) indoctrination **shall** be accomplished.

Completed 3/17/15

A **minimum** of 1 hour of tracker training per required position shall be completed. This training shall not be charged against the allotted target hours and shall be documented on FAA Form 3120-25.

Completed 8/30/15

Following certification on the **first two** radar positions or sectors (if initial certification is being accomplished on a sector versus a position), all trainees (including CPC transfers) **shall** be scheduled to "season" for a minimum of 45 days following the date of certification; unless requirement is waived by the OM.

Completed 4/11/15

Prior to certification on the **last radar** position, trainee **shall** work at a minimum, one midnight shift to receive training on working approach control airspace.

Completed 8/12/15

12. Comments	12A. References

2. Safety alerts are provided.
Not needed.

General Comments.
ATL on West OP, light to moderate chop with 7 MIT on DIRTY and 20 MIT on EVULE. Good phraseology. Good job coordinating with R-Side and surrounding sectors. Good knowledge on SOPs/AITs/LOAs. Good scan and speed. CONGRATS and keep learning!

2. Safety alerts are provided.

Discussed safety alerts and how to handle them.

14. Rapidly recovers from equipment failures and emergencies.

Discussed equipment failures and emergencies and how to handle them.

General Comments.

Some weather in sector with light chop but no deviations. Some good crossing and climbing traffic issue that needed to be worked out, handled well. Good phraseology. Fully understands SOPs, LOAs and AITs. Good scan and speed today. Good job with getting the ALT arrival down under the FL350 traffic going to the Caribbean. Good job on P/Os and APREQs. Keep working on correlating URET to RADAR and vise-versa. Stay engaged and be proactive. Good job!

NOTE TO FILE:

After careful review of 3120-1 Training Folder and TRAX reports, we have found the following training records omitted from file. These files consist of records from Jan 2010 – April 2010. Please see reprints from Feb. 6, 2012.

If any questions, please contact the Training Manager, Doris L. Wilson or the RTSC Contract Site Supervisor, John DiPetta.

Thanks,
Training Department

Operations Supervisor Area Cross Training Checklist

To fulfill the requirements for Z-pod training the Operations Manager must ensure the Operations Supervisor meets experience requirements established by the Air Traffic Manager. The following Checklist is to be completed prior to Out of Area Assignment for the Operations Supervisor.

Z-pod Area 4

	OS initial	Date
Review of Area Maps/Airspace	[redacted]	1/31/16
Review of Area Location Identifiers	[redacted]	1/31/16
Area Rating Test completed with a score of 80% or greater	[redacted]	1/31/16
Review Area Letters of Agreement	[redacted]	1/31/16
Review Area Standard Operating Procedures	[redacted]	1/31/16
Review Area Sector Binders	[redacted]	1/31/16
Area OJT for the following:		
Familiarization with Area OM, OSs, and workforce	[redacted]	1/31/16
Opening and Closing Area	[redacted]	1/31/16
Review equipment configuration/operation for Area	[redacted]	1/31/16
Review Area specific Contingency Plans	[redacted]	1/31/16
TMU familiarization for the Area identifying:		
Traffic Flows/System Operations	[redacted]	1/31/16
Route Swaps	[redacted]	1/31/16
Playbooks	[redacted]	1/31/16
Review of the following for the Area:		
Best Practices	[redacted]	1/31/16
Airspace (sector) configurations	[redacted]	1/31/16
Automations adaptations including communications and airspace	[redacted]	1/31/16
Satellite facility hours of operations	[redacted]	1/31/16
Special Activity Airspace	[redacted]	1/31/16
Military Operations	[redacted]	1/31/16

AREA 4 AREA RATING TEST
UPDATED NOVEMBER 2012

NAME Scott Gaucher DATE 1/31/16 SCORE 100%

1. Turbojets inbound to Macon/Middle Georgia Regional Airport (MCN) operating at or above 11,000 feet shall be cleared to the destination airport to cross 15 miles from Macon Vortac at _____.

[redacted]
10,000 feet and 250 knots
8,000 feet
11,000 feet and 250 knots
9000 feet

2. Departures from Macon/Middle Georgia Regional Airport (MCN) requesting 11,000 feet or above shall be cleared to _____ and told to expect their filed altitude 10 minutes after departure.

[redacted]
10,000 feet
11,000 feet
9,000 feet
requested altitude

3. The altitude limits of restricted area R3002E are _____.

[redacted]
4,000 feet to 8,000 feet.
14,000 feet to FL250
Surface to 14,000 feet
8,000 feet to 14,000 feet

4. South departures with a destination of Daytona Beach (DAB) or Sanford (SFB) shall be climbing to FL300 or requested westbound altitude, if lower.

[redacted]
TRUE
FALSE

5. The initial approach fix and altitude used for aircraft making a HI TACAN RWY33 approach to Robbins AFB (WRB) is _____ and _____ feet.

[redacted]
CUMAK; MCN138029; 18,000
EASTMA ; 16,000
WODET; MCN138036; 16,000
TEMAC ; 18,000

6. Prop departures from Hartsfield-Jackson Atlanta Intl Airport (ATL) shall be cleared to _____.

[redacted]
8,000 feet
7,000 feet or requested
11,000 feet
11,000 feet or requested altitude if lower

7. Arrivals to the AGS Terminal Area from the East Departure Sector shall be cleared direct IRQ direct to the destination airport and _____.

descend to 13,000
descend to 11,000
cross 20 miles west of IRQ at 11,000
cross 15 miles west at 13,000

8. Albany/Southwest Georgia Regional Airport (ABY) arrivals transitioning from ZTL to ZJX shall be descending to _____ feet.

3,000
6,000
8,000
11,000

9. If all sub areas of Restricted Area R3002 are active, what altitudes are in use?

urface to 8,000 feet
urface to 14,000 feet
urface to FL240
urface to FL250

10. Prop aircraft inbound to Carrollton/West Georgia Regional-O. V. Gray Field (CTJ) from the south shall be:

cleared direct to the destination airport and cross 20 miles from the A80 Atlanta Sector boundary at 11,000 feet and handed off to the A80 Macon Sector.
coordinated on an individual basis.
assigned a discrete beacon code.
descended to the MCN Approach Control initial altitude and transfer of control accomplished in sufficient time to allow A80 Macon Sector to comply with normal inbound procedures.

11. Turbojet departures from the Macon/Middle Georgia Regional Airport requesting above 11,000 feet shall be cleared to _____ and told to expect their filed altitude 10 minutes after departure.

11,000 feet
requested altitude
10,000 feet
8,000 feet, released on contact

12. If an F-15 Functional Check Flight (FCF) departing Robins AFB (WRB) requests an unrestricted climb to 15,000 feet MSL, the Sinca Sector shall:

coordinate with the SOUTH DEPARTURE sector for approval.
advise A80 of an unrestricted climb to 15,000 feet MSL within a 5 NM radius of Robins AFB (WRB) is approved.
advise A80 of an EDC time if either SINCA or SOUTH DEPARTURE Sector is unable to approve an unrestricted climb.
all of the above.

13. In accordance with the ZTL/ZJX LOA, inbounds to Shaw AFB (SSC) shall cross the center boundary at or below _____.

[redacted]
FL230
FL180
FL210
11,000 feet

14. Turbojet aircraft inbound to satellite airports north of V18 in the Atlanta Terminal Area shall enter A80 Atlanta Approach airspace from the southeast at _____.

[redacted]
4,000 feet and 250 kts or less
6,000 feet and 250 kts or less
10,000 feet and 250 kts or less
11,000 feet and 250 kts or less

15. The IRQ transition to the SINCA STAR is made up of the IRQ _____ radial to SINCA intersection.

[redacted]
257
247
264
243

16. Downwind turbojets landing Hartsfield-Jackson Atlanta Intl Airport (ATL) during an east operation, via SINCA, shall cross the Atlanta _____ DME at _____ feet.

[redacted]
20 ; 12,000
25 ; 13,000
40 ; 14,000
40 ; 13,000

17. All turbojet aircraft landing at Hartsfield-Jackson Atlanta Intl Airport (ATL) shall be established on the STAR prior to the ATL _____ DME.

[redacted]
29
35
40
45

18. Base leg turbojets landing Hartsfield-Jackson Atlanta Intl Airport (ATL) during a west operation via SINCA shall cross the Atlanta _____ DME at _____ feet and 250 knots.

[redacted]
20 ; 11,000
40 ; 12,000
40 ; 13,000
50 ; 16,000

19. The HI-VOR/DME RWY15 approach plate for Robins AFB (WRB) depicts the TEMAC DME fix as MCN _____.

[redacted]
146036
139029
142028
141029

20. Charlotte/Douglas Intl Airport (CLT) arrivals over flying IRQ from the DUBLIN Sector shall _____.

[redacted]
be cleared via the UNARM STAR or ADENA STAR
be sequenced for the SPARTANBURG sector
cross LUKES at FL240 unless otherwise coordinated
all of the above

21. DUBLIN and MACON Sectors shall be responsible for accomplishing radar point out procedures to the SPARTANBURG Sector on all aircraft that will transition the _____ when released.

[redacted]
Athens West Area
ATL Terminal Area
Bulldog MOA
SINCA Sector

22. Aircraft entering the BURNE Sector from the MACON Sector shall be assigned _____.

[redacted]
eastbound altitudes
a 360 heading
westbound altitudes
a heading to remain clear of the CROSSVILLE and LANIER Sectors

23. Advanced NAV turbojet arrivals, north of V18, to A80 Atlanta Sector Satellite airports shall be cleared via _____.

[redacted]
as filed
SINCA STAR
JRAMS STAR
CAE.V325.AHN direct (destination airport).

24. At the HAMPTON Sector, inappropriate altitude for direction of flight approval is not required for northbound aircraft into the BLUERIDGE Sector, or southbound aircraft from the BLUERIDGE Sector into the HAMPTON and CLARK HILL Sectors

[redacted]
TRUE
FALSE

25. Aircraft operating at or above FL240 transitioning from ZJX to ZTL, which cross the center boundary between four miles west of the centerline of J47 eastward to the Washington Center boundary, or entering ZTL from the AMG/MGR sectors shall be assigned _____.

[redacted]FL230
FL240
eastbound altitudes
even altitudes

26. Aircraft inbound to Savannah/Hilton Head Intl Airport (SAV) from the southern edge of V185 southward to the center line of V154 shall cross the ZTL/ZJX Center boundary at or below FL _____ with a restriction to cross 35 miles west of SAV Vortac at 11,000 feet.

[redacted]200
210
220
230

27. Due to the sonic boom effect on cities, controllers should advise the pilot of an F15 Functional Check Flight (FCF) if he deviates _____ miles or more from the speed run course.

[redacted]2
4
6
8

28. Atlanta Terminal southbound departures via J45 will be cleared at odd altitudes above FL240 unless coordinated.

[redacted]TRUE
FALSE

29. At the HAMPTON Sector, arrivals to Charlotte/Douglas Intl Airport (CLT) from the west shall be cleared to maintain _____, pointed out to the CLARK HILL Sector and handed off to GEORGIA HIGH.

[redacted]FL360, released for descent to the GEORGIA HIGH Sector
FL300
FL340
FL350

30. The Athens West Area includes which of the following altitude segments:

[redacted]FL240 thru FL270
FL230 thru FL250
FL180 thru FL230
FL240 thru FL290

[redacted]500 feet AGL to 17,000 feet MSL
as coordinated
11,000 feet MSL to FL270
10,000 feet and below

45. If radio failure occurs after receiving a MOA/ATCAA clearance, the pilot shall depart from _____ at the EFC time and proceed to the destination at the highest altitude of the last assigned block.

[redacted]IRQ Vortac
KNINE Intersection
IRQ180030
DBN020045

46. Who assumes responsibility for separation of military aircraft while operating in the Bulldog MOA/ATCAA?

[redacted]Augusta Tower
Atlanta Center
Military
JAX Center

47. The missed approach procedure for the RNAV (GPS) RWY 14 approach at the Swainsboro/Emanuel County Airport (SBO) is:

[redacted]climb to 2500 direct WINSI and hold
climb to 2000 direct SBO Vortac and hold
climb to 1200 then climbing left turn to 2000 to SBO Vortac and hold

TRAINING PLAN

Developmental: Scott A Gaucher (SY)

Area: AREA 3

Supervisor: Torrance L Branch

The purpose of this document is to outline the training objectives for Scott A Gaucher. The members of the training team agree to implement these objectives in a positive and timely manner. The training team will meet on a periodic basis to discuss Scott A Gaucher's training performance and will revise this training plan as appropriate.

Position(s) and target hours:
A4SUP - 80 hours

Effective Date: Jan 29, 2016

Primary OJTI: Christopher K Tomlin

Secondary OJTI: Felicia Miller-Brown

Objectives:
Operations Supervisor Z-pod Training

Requirements include;

Review of Area Maps/Airspace
Review of Area Location Identifiers
Area Rating Test completed with a score of 80% or greater
Review Area Letters of Agreement
Review Area Standard Operating Procedures
Review Area Sector Binders

Area OJT for the following;
Familiarization with Area OM, OSs, and workforce
Opening and Closing Area
Review equipment configuration/operation for Area
Review Area specific Contingency Plans
TMU familiarization for the Area identifying;
Traffic Flows/System Operations
Route Swaps
Playbooks

Review of the following for the Area;
Best Practices
Airspace (sector) configurations
Automations adaptations including communications and airspace
Satellite facility hours of operations
Special Activity Airspace
Military Operations
Z-pod Training is to be recorded on form ZTL 3120-34, Operations Supervisor Area Cross Training Checklist. The form must be signed by the Operations Supervisor and their Operations Manager then forwarded to ZTL520.

12. Comments [redacted]	12A. References

General Comments.

Scott is now certfied on both the D/R positions at sector 15 in Area 3. These sectors will be what Scott uses to maintain required currency in the area as an FLM. Scott provided positive separation during his evaluation and used prescribed phraseology. Good job issuing merging target procedures.

Conducted by Devon W Pym (DV)

General Comments.

Mr. Gaucher worked the SINCA/AGUSTA Sectors combined with and without a Radar Associate. The traffic was moderate and at times difficult. Weather wasn't an issue. Mr. Gaucher took command of the sector and completed task/coordinations in a timely manner. Once a Radar Associate was placed on the sector, he made sure all necessary task were completed and at times directing them to complete certain tasks. Phraseology, and speech rate/voice quality was good. He combined transmissions and gave clearances in a timely manner. Speed control and vectors were adequate.

N7586V read back an incorrect frequency and it was immediately corrected.
Realized overtake situation between TRS655 and TRS336.
Started Vectors for sequencing arrivals early. Example: ASQ5356, 20SW of IRQ, was turned 15 Degrees left and assigned a speed.
Early coordination's with N1548V, non-radar at 60 with MCN Approach.
Control for descent and turns obtained for N345Sk (landing PDK) with R21, to ensure there would be no conflicts with the CANUK arrivals. Good use of combining transmissions. Example: N345SK cross 10N of MCN at 110 and cross TRBOW at 250KTS.
Good use of the URET to realize conflicts. N50AX, TBM7 (Landing CLT Sat), was given; "Cross 10S of GRD at maintain 120" and coordinated with R31 because of mutual traffic at 110.
N278CB was inbound to CHS and Mr. Gaucher realized the flight plan didn't include a STAR. He issued the pilot the correct STAR.
Traffic calls were given in accordance with the 7110.65.
He had to complete several manual hand-offs. One in particular was PHENON1 landing WRB. He tried to ARTS Force, amend routes and altitudes. All failed and manual hand-off with MCN approach was completed.

Mr. was professional with the pilots and on the VSCS with other controllers. Mr. Gaucher is now certified on R19 and R24. This completes his R-side training and is now a CPC.

12. Comments	12A. References

General Comments.

During this session, ATL was on a west operation minimum in-trail. There was a mix of overflights with arrival traffic to both ATL and satellite airports. There were two NFRNO flights(military) crossing the southern end of the sector at FL280 and BOMA50 crossing southeast at FL250. These aircraft increased the complexity due to the crossing points with the CANUK arrival.

Mr. Gaucher did a good job delegating tasks to the D-side and kept an effective speed with a good scan. This was evidenced when CHQ6043 crossed the sector 32 boundary and had not yet checked-in, the call was made to see if the aircraft was monitoring and not yet called.

All aircraft were positively separated and an efficient flow was maintained. The sector was well managed and gaps between arrivals were made, sustained or closed appropriately. The boundary was clearly scrutinized and a call was made to sector 32 to hand-off AWE886 in a timely manner, allowing time to retain the aircraft in our sector should the hand-off be refused.

Good coordination, planning and execution of that plan clearing TRS629 -TENNI. This allowed an early descent on CHQ6043 and removed head-on traffic with the IRQ transition to the CANUK arrival.

CLARK HILL AND HAMPTON WERE COMBINED AT R23. BAD RIDES THROUGHOUT OUR AIRSPACE. ALMOST EVERY AIRCRAFT HAD QUESTIONS OF CONCERN AS TO WHAT THEY WAS OR WOULD ENCOUNTER. TMU INIATIVES TO ALL OF NEW YORK METRO AND DC METRO AIRPORTS. SCOTT DID A VERY GOOD JOB MANAGING THE SECTOR. HE WORKED WELL WITH THE D-SIDE. ALL COORDINATION WAS COMPLETED. HE UTILIZED SPEED, VECTORS AND VERTICAL ALTITUDE TO MAINTAIN SEPARATION. HE INITIALLY ASSIGNED SPEED MA77- TO SEVERAL ACFT IN TRAIL WITH EACH OTHER. NOT A GOOD PRACTICE. HE RECOGNIZE THIS AND MADE THE NECESSARY CORRECTIONS.

WE DISCUSSED A2 AND D14

MR GAUCHER IS CERTIFIED AT R23 AND R27.

Signature: [redacted] Date: 6-20-11

LIGHT CHOP THROUGOUT AIRSPACE. NOT MANY ALTITUDE CHANGE REQUEST HOWEVER A CONSTANT CONVERSATION ABOUT THE RIDES. WHEELER ORBIT ACTIVE @ FL300 CREATING MANY INTERIM ALTITUDE CLIMBS. ALL COORDINATION WERE COMPLETED BY SCOTT. A COUPLE OCCASIONS SCOTT CHOSE TO WAIT AND WATCH A SITUATION WHERE A POINT OUT MAY BE NEEDED. I ADVISE HIM TO GO ON AND MAKE THE POINT OUT SO HE CAN CONCENTRATE ON OTHER POSSIBLE SITUATIONS. VERY GOOD PHRASEOLOGY. GOOD SOB WORKING WITH R-SIDE.
