Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

This summary is based on, audio recordings from Air Traffic Control Tower (ATCT) and written reports from the flight crewmembers.

According to the ATC audio, SKW 5326 was cleared onto runway 33 after Southwest Airlines flight 2250 had landed. Mesa flight 5826 then checked in with the tower, reporting that they were on a visual approach to runway 33. The Tower became involved with mixed traffic landing on the crossing runway 26 and instructed a Cirrus aircraft to go-around while clearing a police helicopter to land on runway 26. The Tower then clears SKW 5326 for takeoff and Mesa flight 5826 to land on runway 33. When Mesa 5826 requested clarification to land, the Tower responded firmly that they were cleared to land. However, an unidentified voice is heard asking if SKW 5326 was clear of the runway and Mesa flight 5826 responded no and announced they were going around. It appears Mesa flight 5826 was about a mile from the runway threshold and 400 feet above the touchdown point when the go-around was initiated. The Tower instructed Mesa flight 5826 to maintain runway heading and climb to 4,000 feet. During the departure procedure, at approximately 2,100 feet (1,300 feet above ground level) SKW 5326 received a TCAS descend resolution advisory (RA) which was followed by arresting the climb rate. After the RA was resolved, the Tower instructed SKW 5326 to contact SoCal Departure, cleared SKW 5326 to contact SoCal Departure and the flight continued to San Francisco International Airport (SFO) without further incidents.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Conduct SRM to identify and develop controls for systemic issues related to local ATC procedures.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
