Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

During a damage survey, the following discrepancies were identified on the fuselage barrel;

#1 The OML (Outer Mold Line) surface of the fuselage has been abraded from STA 1642 to STA 1714, between STR-39L and STR-39R.

#2 There were three full depth cracks on the OML surface.

1) 2.3"L X .15"W (at widest point) exists C/T STA 1669 BTW STR-40L and STR-40R. 2) 35" L exists C/T STR-40L stringer cavity, beginning at STA 1647, running AFT. 3) 31" L exists C/T STR-40R stringer cavity, beginning AT STA 1647, running AFT.

#3 The VHF(R) antenna is bent and has several cracks through the exterior casing.

#4 The lower surface of the tail strike sensor has been ground away.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On February 27, 2026, at approximately 13:53 UTC, a Boeing 787-9, JA873A, operating as Flight NH114, experienced a tail strike during landing on Runway 26L at Houston George Bush Intercontinental Airport (IAH). Due to low visibility, the aircraft was performing an autoland. Following main gear touchdown, the flight crew initiated thrust reverser deployment. During this sequence, the autopilot transitioned to Go-Around (GA) mode, resulting in an uncommanded pitch-up attitude. The aircraft's aft fuselage made contact with the runway surface. The pilot-in-command (PIC) subsequently applied nose-down input, disconnected the autopilot, and completed the landing roll. Post-flight inspection revealed substantial structural damage to the lower aft fuselage. There were no injuries to the 192 passengers or 12 crew members.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Under investigation.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
