Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

N/A

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On November 19th 2024, GoJet Airlines flight 3375 operated as a reposition flight between KRIC and KIAD. The flight was unremarkable until the descent phase. The autopilot failed to capture a preselected altitude of 3000' MSL. The pilot flying intervened at approximately 2700' MSL by disconnecting the autopilot, re-trimming the stabilizer, and re-engaging the autopilot. As the aircraft approached the IAD airspace it was cleared to 2000' MSL. Descent was initiated on the autopilot, however the crew received the EICAS message "AP TRIM IS NU" at approximately 2500' MSL. The crew completed the Quick Reference Handbook (QRH) checklist and re-engaged the autopilot. The Captain subsequently disengaged the autopilot when cleared for a visual approach to runway 19L. The crew reported the aircraft flew normally until the landing flare when the Captain (pilot flying) stated the left control column was abnormally stiff and exhibited minimal movement when pulled. The aircraft touched down without further issues.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Investigation still ongoing.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

PN 822-0260-001 Servo Mount (Suspected failure of clutch with in mount)

PN 622-5027-101 Servo Elevator (Removed and Replaced as a precaution but do not believe to be source of failure)

PN: BA670-93710-17 Elevator Servo Cable (Found Broken)

PN: BA670-93710-19 Elevator Servo Cable (Removed and replaced due to matching cable of set being found broken)
