

Witness Statement - JEFFREY BRYANT

Friday April 23<sup>rd</sup>, 2011. Close to 10 P.M.

It was a little bit before 10 P.M. on Friday night when my mother asked me if I heard a plane or a helicopter outside; she said it sounded low. I told her I did and walked to my window facing the Staunton River and twisted the blinds. No sooner than I looked out the window, I saw two red wing lights from a small plane. The plane was very close to the roof of my house and I heard the low humming of the engine. It was very dark and foggy so I was not able to see specific details but I could make out a small plane traveling at a fast speed. After flying over my house, the plane took an angled right turn around a group of trees to the right of my house. I saw the red lights through the trees, but then they vanished, and it felt like a second went by before I heard the crash of the plane.
