Narrative:

On 09-19-2011, I, Sergeant Brian Hagan was dispatched 2800 North West 20th Trail the Okeechobee County Airport in reference to a airplane crash.

Upon arrival I met with pilot of the aircraft Peter Mikos. Mr. Mikos told me that he was alone and had just landed his 1993 Bakewg Deuce Experimental Airplane tail number N79GH on runway 23. This runway is the west runway of the airport. Mr. Mikos was traveling east into the airport. As he was slowing down the landing gear (this landing gear is a fixed style landing gear) gave way and the aircraft collapsed onto its belly causing the aircraft to spin in a counter clockwise rotation. The aircraft spun one hundred and eighty degrees before coming to a stop on the runway. When the landing gear collapsed it caused the prop to touch the asphalt runway. The wooden prop was damaged. The aircraft did roll to its right side also causing damage to the right wing. Mr. Mikos was not hurt during the incident. Airport Manager Kathy Scott was on scene and reported the incident to the FAA. The FAA did agree to move the airplane off of the runway. John's Towing was
